

Allegations re ex-worker Joseph Schoen

Jun 17

Joseph Schoen, an ex-brother worker, has multiple allegations of historical childhood sexual abuse. Joe has been reported to local police where the abuse happened. We are posting in case there are other victims who may want to come forward with more information, and to encourage any to reach out to us for resources or info.

Ed Alexander (who was head worker over Arizona at the time) was allegedly told about the abuse and did not report it, despite the victim still being underage at that time. Larry Greenaway also knew of the abuse, although it is not clear when he was informed.

Joe Schoen is no longer attending meetings due to health issues. However, he was never restricted from attending meetings or kept away from meetings with children in them.

Joe Schoen was in the work from 1976 to around 2007. When he left the work, the reason given was health. Joe labored in California, Arizona, and Washington states.
