

Gordon Olson regarding the deceitful policy of workers to hinder a healthy information flow

St. Albert, Alberta
Canada

I have been told tonight that a lot of effort is being taken to spread the message around to people in the church not to believe anything that is being said or that you read online.

I guess maybe I shouldn't be surprised but when I hear how much effort is being taken to cover up what has been going on, it is really disheartening.

I have been trying to take the high road and look at things from all perspectives, but the effort to discredit the truth about what is actually happening so that your congregation doesn't know what is going on is hard to take. The effort of the leaders to cover up what is happening is so deceitful.
